[Advances in Medicinal Chemistry, Volume 5 - 1st Edition](#)

Volume 5 of Advances in Medicinal Chemistry contains four intriguing and detailed accounts of the close interface between synthetic chemistry, structure-activity relationships, biochemistry, and pharmacology. In Chapter 1, there is a comprehensive survey of the immunophilin area specifically focussing on neuroregenerative applications in the central nervous system. In Chapter 2, there is an

The Advances in Chemistry series, part of the ACS eBooks, was the predecessor to the ACS Symposium Series. This high-quality, peer-reviewed book series was published from 1949 1998 to provide the research community with an avenue to publish content and special topics that was beyond the scope of the existing ACS journals
