Some of the more recent biosensor applications were presented at Biosensors 2010 held in Glasgow, Scotland, May 25-28, 2010, such as direct detection of drugs in serum, theranostic platform for cytotoxicity evaluation of amyloid-forming neurodegenerative causative proteins, detection of amyloid precursor protein, and detection of signaling proteins released by single cells.

"Handbook of biosensors and biosensor kinetics provides an overview of biosensor development and potential applications that is largely focused on the details of analyte receptor kinetics, specifically fractal analysis. This perspective may be of value to an audience of theoreticians and modelers."--Anal Bioanal Chem 2012 vol.402 pp.1409-1410

### [Handbook of Biosensors and Biosensor Kinetics by Ajit...](#)

This book, like the previous five books on biosensors by  
this author (and one by the co-author), addresses the  
neglected areas of analyte-receptor binding and  
dissociation kinetics occurring on biosensor surfaces.

Topics are covered in a comprehensive fashion, with  
homogeneous presentation for the benefit of the reader.
