chemical composition and mechanical properties. The sheet steels normally used to form Canam steel deck profiles correspond to ASTM A 653M SS Grade 230. They have a yield strength of 230 MPa (33 ksi) and a tensile strength of 310 MPa (45 ksi). Steel with higher yield strength or different ASTM designation can be used to meet specific needs. Introducing categories to the practicing physicist  
arXiv:0808.1032v1 [quant-ph] 7 Aug 2008 Bob Coecke  
Abstract We argue that category theory should become a part of the daily prac- tice of the physicist, and more specific, the quantum physicist and/or in- formatician. The reason for this is not that category theory is a better way of doing mathematics, but that monoidal categories constitute

In this article, we study the bounded derived categories of finite-dimensional algebras that are discrete in the sense of Vossieck [44]. Informally speaking, discrete derived categories can be thought of as having structure intermediate in complexity between the derived categories of hereditary
