[Reproductive Health and Gender Equality: Method ...](#)
Her current book Reproductive Health and Gender Equality: Method, Measurement, and Implications offers an important empirical study on women's reproductive health. The book presents an innovative framework for analysing women's reproductive health and its intersection with gender equality, women's human rights, and maternal-child care in the context of economic and political development.

[Reproductive Health and Gender Equality: Method ...](#)
In Reproductive Health and Gender Equality, Guang-zehn Wang tackles the important question of what determines women's reproductive health cross-nationally. Her book is organized around three specific objectives. First, she seeks to clarify the meanings and content of the constructs of women's

Since the late 1990s approaches to women's reproductive health has shifted from a service-based model to a human rights approach. This approach associates reproductive health with freedom from

[Reproductive Health and Gender Equality | Method ...](#)
Since the late 1990s approaches to women's reproductive health has shifted from a service-based model to a human rights approach. This approach associates reproductive health with freedom from discrimination and enjoyment of a satisfying and safe sex life, and full access to information and services related to reproduction.

[Reproductive Health and Gender Equality: Method ...](#)
In spite of this shift, and the global effort to promote women's reproductive health through the enhancement of human rights and gender equality, progress has been very slow. In this book the author fills a much-needed empirical study of women's reproductive health. The author assesses data from 137 developing countries (or areas) and challenges the prevailing bioscience and public health

[Reproductive health and gender equality : method ...](#)
Reproductive Health and Gender Equality offers a much needed empirical study of women's reproductive health. The author challenges the prevailing bioscience and public health models by linking women's reproductive health to gender equality measures and development policies.
