Unimodal and Multimodal Biometric Data Indexing

### [Unimodal Biometrics vs. Multimodal Biometrics](#)

Biometrics technology is based on the principle of measuring and examining the biological traits of individuals, extracting the unique features from this acquired data and then comparing it with the template set stored in the biometric templates database.

**[Multimodal Biometric Systems - tutorialspoint.com](#)**  
All the biometric systems we discussed till now were  
unimodal, which take single source of information for  
authentication. As the name depicts, multimodal biometric  
systems work on accepting information from two or more  
biometric inputs. A multimodal biometric system increases  
the scope and variety
